

# TECHNOLOGY

**CHAOS**

?

With competing provider priorities, how does your organization align to avoid you drowning, getting disoriented and being **STUCK** in technology?

Regarding technology expenditures for your organization, what budgetary procedures are you executing to avoid feeling cornered, irritated and **SHOCKED**?

Unplanned, disorganized and **SCATTERED** projects will become your long term technology vision in lieu of your organization implementing what tools and processes?

Cyberthreats lead organizations to feel **EXPOSED**, liable and vulnerable, which requires you to implement what policies, procedures and oversight?

In spite of reports and metrics your practice may have, do you still feel blind, dysfunctional or **LOST** because you need additional insights?
